## About

My guitar teacher used to say: "This is my niche, right here. I love playing guitar, I'm not working when I'm playing guitar, and I've never had more fun playing than right now." I have found my niche in software development. It's not work to me, it's something I love doing, and something I choose to do in my spare time. I consider myself one of the lucky few who are employed doing something that they genuinely love and enjoy. I echo the words of my guitar teacher that I've never had more fun coding than I am having right now.
